

Increase your productivity with the new FS Pro 4.0!

New features in version 4.0

- Integrated in the **Microsoft® Word 2003 and 2007** interface
- FS Pro 4.0 **license key** activation
- **New installer** for fast and easy installation
- **Document Validator**: check the validity of your document's styles before you save it as XML or a web page.
- **Enhanced Font Manager**: create multiple font sets and save them for reuse
- **Multiple design templates**: select your favorite design template and change the look & feel of your document
- **Clickable Topic-See Page table**: navigate from your Topic-See Page table with automatic hyperlinks
- Support for **64-bit Windows OS**

What is FS Pro?

FS Pro is software that integrates with Microsoft Word® and that allows users to quickly and easily create **professional looking documents by applying the Information Mapping® principles.**

Advantages

- Through the use of a standard format, writers and editors will reap the benefits of creating and using **easy-to-read, well-structured documents.**
- Your organization can quickly standardize on one look and feel for documentation, policies and procedures, reports, proposals, etc.
- In addition, FS Pro provides easy conversion of Microsoft Word documents into **XML or HTML** without the need for tagging.

Adapted to Microsoft® Word 2007

FS Pro 4.0 integrates directly into the Word 2007 Ribbon interface. All your favorite functions are now grouped and immediately available for use! In Word 2003 FS Pro 4.0 is available by means of a dedicated toolbar and menu.

Activation of your software

Your new FS Pro 4.0 will have to be activated with a license key. With only 1 license key you can activate all FS Pro licenses for your entire company.

This increases your productivity because all users will have the same software version.

Document Validator

The Document Validator allows you to check the validity of the styles before you save your document as XML or a web page.

When the Validator detects an invalid style, it will propose an alternative style.

Fast and easy installer

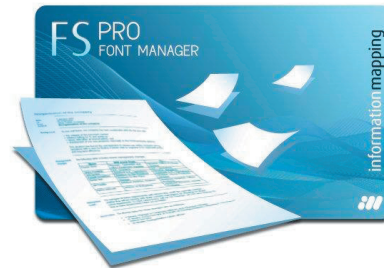

The new FS Pro Install Wizard is easier and less likely to be blocked by security software. It allows you to install FS Pro for all users of the pc instead of for just one. This will speed up the installation process significantly.

Enhanced Font Manager

In the new Font Manager, you can create and save several font sets. Depending on the project you are working on, you can select the most appropriate font set.

By default, a number of font sets are available in the Font Manager, but you can create an unlimited number of new ones very easily and save them for later reuse.

Support for 64-bit Windows OS

As 64-bit Operating Systems are increasingly used, FS Pro 4.0 is adjusted to run on these OS as well.

In addition, you will be able to load the font sets from the Set Preferences dialog window in FS Pro. This way, you can use font sets very efficiently.

Clickable Topic-See Page table

The Topic-See Page table will automatically create hyperlinks to the maps that it refers to, further in your document.

This way, you can navigate faster and more easily through your document.

Multiple design templates

In previous versions of FS Pro, only one FS Pro design template was available. Now, in FS Pro 4.0, multiple design templates are available by default!

The new design templates allow you to create Information Mapping documents with for example block labels on top of the block, or with text in two columns.

By providing other design templates, FS Pro proves that the Information Mapping method is independent of the look and feel of a document.
