

How to do a silent installation of FS Pro 4.0?

Definition An unattended or silent installation is an installation that

- does not require user intervention, and
- does not display the progress of the installation.

Procedure Proceed as follows to do a silent installation of FS Pro 4.0:

| Step | Action |
|------|--|
| 1 | Push the .NET Framework V2.0 or higher out before FS Pro to make sure it is there first. |
| 2 | Run the FS Pro installer with the /VERYSILENT switch [FSPro4.0.exe /VERYSILENT] |

Applies to FS Pro 4.0
